Independent living needs assessment	84%	Education finance assistance	24%
Housing education and home management training	54%	Other financial assistance	24%
Academic support	54%	Employment programs or vocational training	6%

¹ Unless specified otherwise, data on foster care is from the federal Adoption and Foster Care Analysis Reporting System (AFCARS), and represents federal fiscal year (FFY) 2015 (October 1, 2014 – September 30, 2015). Unless otherwise noted, for each calculation, children who were missing data on the relevant indicator were excluded from analyses. Number of youth age 16 to 21 served in foster care during FFY 2015. Age is calculated on the last day of the fiscal year or the day they exited care.

² Data are from Child Trends' state fiscal year (SFY) 2014 Child Welfare Financing Survey. For more information on the survey, see *Child Welfare Financing SFY2014: A survey of federal, state, and local expenditures*. Services and assistance for older youth excludes foster care maintenance payments for youth 18 and older. For most states, figures are based on approximations.

³ Totals add up to more than 100% because youth can have more than one entry reason. The following entry reasons are not presented: abandonment, parental incarceration, child disability, parental death, and relinquishment of parental rights.

⁴ Length of stay in care is calculated based on the current removal episode.

⁵ The number of places the youth has lived, including the current setting, during the current removal episode. Does not include trial home visits.

⁶ These figures may not add up to 100%, as youth who did not yet have a goal established are not presented.

⁷ The goal of emancipation is defined as maintaining the youth in a foster care setting until the youth reaches majority (i.e., is considered an adult) due to age, marriage, etc., as defined by the state.

⁸ Placement as of the last day of FFY 2015 (September 30, 2015) or immediately preceding exit from care. These figures may not add up to 100%, as youth who were runaways are not presented.

⁹ An alternative traditional living arrangement where the youth is under the supervision of the agency but without 24-hour adult supervision, is receiving financial support from the child welfare agency, and is in a setting which provides the opportunity for increased responsibility for self-care.

¹⁰ Of youth who exited care in FFY 2015. Information on exit reasons does not include youth who died. Emancipation means the youth left foster care at the age of majority, as defined by the state. Percentages on exit from care may not add up to 100%, as youth who ran away are not presented.

¹¹ Of youth who exited care in each FFY since 2011.

¹² Includes youth who turned 18 in FFY 2014, and did not exit care within the 30 days before or after their 18th birthday.

¹³ Includes youth who turned 19 in FFY 2015, and did not exit care within the 30 days before or after their 19th birthday.

¹⁴ Permanency includes: reunification, adoption, guardianship, or living with other relative(s).

¹⁵ Other non-permanency situations include: runaway, transfer to another agency.

¹⁶ Data on outcomes of youth who spent time in foster care comes from the National Youth in Transition Database (NYTD). Data for 19-year-olds is from FFY 2013 and for 21-year-olds is from FFY 2015.

¹⁷ Data on youth in the general population comes from the American Community Survey 2011-2015 estimates.

¹⁸ Data are from a survey of child welfare agencies on services and supports for youth transitioning from foster care, conducted by Child Trends in 2015-2016. Extended care refers to a state's child welfare agency maintaining placement and care responsibility of a young person past their 18th birthday (the age of legal majority in most states), through the federally matched Title IV-E foster care program, state and/or local dollars, or other federal sources. After completing the survey, Ohio enacted Fostering Connections legislation to extend the age at which youth can remain in foster care beyond age 18.

¹⁹ Data as of 4/3/2017 from the U.S. Department of Health and Human Services. Extension of foster care through Title IV-E allows states to receive federal Title IV-E reimbursement for certain costs associated with supports to eligible young people to remain in foster care up to age 21.

²⁰ This refers to the age at which the young person can no longer remain under the care and supervision of the state's child welfare agency. Data are from a survey of child welfare agencies on services and supports for youth transitioning from foster care, conducted by Child Trends in 2015-2016. After completing the survey, Ohio enacted Fostering Connections legislation to extend the age at which youth can remain in foster care beyond age 18.

²¹ Data in this table are from Child Trends' SFY 2014 Child Welfare Financing Survey. Most states were only able to provide approximate percentages for how their dollars are spent; we applied those approximate percentages to their total reported spending levels to get estimates of how much they spent on older youth.

²² Services and assistance for older youth excludes foster care maintenance payments for youth 18 and older.

²³ The Chafee Foster Care Independence Program allocates funding to states for expenses related to independent living activities that prepare youth to successfully transition out of foster care. Funding can also be used for services for some young people who have already left foster care. Chafee dollars reported here includes education and training vouchers.

²⁴ Data from the National Youth in Transition Database (NYTD). Young people, age 16 through 26, who received independent living services in FFY 2015 paid for or provided by the state agency that administers the Chafee Foster Care Independence Program.
